

# MSc CASA Ethics Procedure for MSc/MRes Dissertations Flow Chart

There are different ways of addressing ethical considerations while conducting research at UCL. This flow chart and associated documents help students and their supervisors define the level of ethical risk that the research poses and the corresponding ethical review procedure path: whether low, moderate or high risk. All students must define the level of ethical risk that their research poses and (if necessary) ethical approval must be secured before data collection starts.

*\*IF YOU DON'T KNOW THE ANSWER, CONSULT YOUR SUPERVISOR FOR FURTHER ADVICE*

## PRE-SCREENING IN FORM A

## MINIMAL RISK SCREENING

## HIGH/MODERATE RISK SCREENING
